

Welcome to Human Anatomy & Physiology !

This is an upper level course designed to challenge you and prepare you to go on to the next level. Therefore homework is to be handed in on time and all late work will receive less credit. If you miss a day it is your responsibility to find out what you missed. If you miss a laboratory activity, you need to schedule a time to make it up.

Homework in this class is for your benefit, therefore it is in your best interest to keep up with it. If you are struggling or having a hard time understanding, **ASK QUESTIONS!** I will help you as much as I can. I am available in the mornings, after school, during my prep period, and during Advisory time to help.

Students are expected to demonstrate **RESPONSIBILITY** and **RESPECT** at all times and will be prompt and prepared for class. The number one rule is to have a **POSITIVE ATTITUDE!!**

Because classroom behavior is part of your laboratory grade, you can lose points for failing to meet these expectations.

Detentions are given to protect others in the room (as in throwing objects, using inappropriate language, etc.). They are automatic and 30 minutes in length. Most will be served after school on the day they are received or the following morning.

The grading scale is:

100-92%	A	Tests	55% (tests and quizzes)
91-84%	B	Labs	25% (lab/partner work, behavior, class participation)
83-76%	C	Homework	20% (all other assignments)
75-68%	D		
67 or lower	F		

*****Your own set of colored pencils, markers, or crayons is highly recommended!!**
